

# 'NEXT MOMENT' VISUALIZATION

Anticipating the next note, or group of notes can include:

- Name of the next note
- Hearing the pitch in your head
- How your hand (finger, body) feels placing it right there, on the right string in the right position
- Bow direction
- Pressure, speed and amount of bow needed ahead (depending on the time value of the note, dynamics (volume), bow stroke etc.)

Example

**Down bow**

**F#**

**2<sup>nd</sup> finger on the D string (high)**

**Count two beats**

**f = forte, more pressure, speed, nearer bridge etc**
